

- Light pipes with round displays
- For SMT - LED's
- With push-fit peg for PCB assembly
- With one or two light pipes
- Housing provides exact mounting position to front panel
- Housing prevents irradiation
- Substituting LED-Element 26-45.xxx

The light pipe element LHA21 can be used to replace LED-Elements of 26-45 series. SMT-LEDs have to be assembled with reflow soldering. The light pipe element has to be mounted on the PCB after reflow soldering, the light pipe element can be assembled on the PCB, fixed by the push-fit peg.

Mechanical Data**Electrical Data****Material**

LED length max. 3.0 mm

LED width max. 3.0 mm

LED height max. 1.0 mm

suitable LED type 0201, 0402, 0603, 0805

Perm. ambient temperature -40 °C ... +85 °C

Mechanical Data**Electrical Data****Material**

ESD protection 10.0 kV
